Houston, Texas 77227

TecBrake Engine Brake Model T450A/B For Cummins 94N14 Series Engines

The TecBrake T450A/B engine brake may be installed on popular versions of the Cummins 94N14 series engine. It can **not** be installed on the Cummins 855, 88NT, 91N14 STC, 91N14 Celect or N14Plus model engines. It should only be installed on engines whose CPL numbers are included in the Application Chart.

IMPORTANT: Information required to order engine brake kits.

ENGINE IDENTIFICATION:

Obtain the engine's CPL number. Refer to the TecBrake Application Guide, which lists all Cummins engines on which the T450A/B engine brake may be installed.

ADJUSTING SCREW SELECTION:

The engine CPL number determines which adjusting screws are required for the installation. It is important that the proper adjusting screws be selected and installed. Use of the wrong screws or an incorrect lash adjustment may cause improper brake operation and engine damage.

ADJUSTING SCREWS INCLUDED IN KIT:

The T450A/B engine brake kit (Part No. TB960017) is shipped with adjusting screws (part No. TB900022, color code "green") already installed in the brake housings. This configuration is correct for some installations.

Six additional adjusting screws (Part No. TB900023, color code "brown") are included in the Housing Assembly. If Application Guide specifies "brown" adjusting screws, they must be installed in place of "green" screws over the exact same location. **DO NOT** exchange or mix selected adjusting screws within cylinders.

The two adjusting screw part numbers included in the engine brake kit cover all engine configurations.

APPLICATION CHART			
CPL NO.	ENGINE MODEL	ADJUSTING SCREW PART NO.	COLOR
1807	94N14	TB900022	GREEN
1809	94N14	TB900023	BROWN
1844	94N14	TB900023	BROWN
